

ChicDressing.com

Rapport de performances

Performance

Le site pâtit d'un très mauvais score de performance.

Cela impacte l'expérience utilisateur de vos visiteurs mais également le référencement naturel du site sur Google et donc vos ventes !

Vous trouverez ci dessous l'explication des principaux problèmes relevés par Google PagesPeed et nos recommandations pour y remédier.

Note : une investigation plus poussée une fois les accès au site partagés nous permettra d'identifier d'autres axes d'améliorations !

Optimisation des images

▲ Properly size images

5.88 s ▼

▲ Serve images in next-gen formats

12.91 s ▼

Les images chargées dans les pages sont beaucoup plus grandes que la taille réellement utilisée et ne sont pas optimisées pour le web.

Plusieurs images pèsent plusieurs méga octet :

jpeg	(index)	3.3 MB
jpeg	(index)	2.1 MB
jpeg	Other	2.1 MB
jpeg	(index)	2.0 MB
jpeg	(index)	1.2 MB

Nous recommandons

- d'adapter les templates pour charger les images à une taille adaptée
- d'optimiser les images pour en réduire le poids

Ressources statiques

Minify CSS	0.19 s	▼
Minify JavaScript	0.19 s	▼

Les fichiers CSS et JS pourraient être minifiées, c'est à dire compressées pour moins impacter le poids total de la page et en accélérer le chargement.

▲ Eliminate render-blocking resources	1.26 s	▼
---------------------------------------	--------	---

De nombreuses ressources statiques (CSS, JS etc.) bloquent le rendu de la page dans le navigateur alors qu'elles pourraient être chargées en différé.

Nous recommandons :

- de mettre en place une extension pour minifier automatiquement ces ressources.
- de différer le chargement des ressources non essentielles après l'affichage de la page pour en limiter l'impact sur l'expérience utilisateur

Ressources externes

▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 1,390 ms	▼
---	---

Le chargement de ressources externes comme Google Maps, Twitter et Google Fonts (pour les polices de caractères personnalisées) impacte très fortement le chargement de la page.

Nous recommandons

- *de différer le chargement des contenus externes (Google Map et Twitter) après première interaction de l'utilisateur*
- *de charger les polices Google Fonts localement (depuis le serveur) pour limiter l'impact sur les performances*

Temps de réponse serveur

▲ Reduce initial server response time

1.73 s ▼

Le temps de génération de la page côté serveur est très long.

Nous recommandons : *de mettre en place du cache pour ne pas régénérer la page à chaque visite*

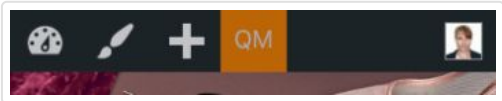

There were issues affecting this run of Lighthouse:

- **Chrome extensions negatively affected this page's load performance. Try auditing the page in incognito mode or from a Chrome profile without extensions.**

These suggestions can help your page load faster. They don't [directly affect](#) the Performance score.

DIAGNOSTICS

▲ Avoid enormous network payloads — Total size was 15,555 KiB ▾

▲ Avoid an excessive DOM size — 25,376 elements ▾

▲ Ensure text remains visible during webfont load ▾

Warnings: Lighthouse was unable to automatically check the `font-display` values for the origin <https://fonts.gstatic.com>.

▲ Reduce the impact of third-party code — Third-party code blocked the main thread for 1,390 ms ▾

▲ Does not use passive listeners to improve scrolling performance ▾

-  Image elements do not have explicit `width` and `height` 
-  Minimize main-thread work — 11.4 s 
-  Reduce JavaScript execution time — 6.4 s 
-  Serve static assets with an efficient cache policy — 72 resources found 
-  Avoid chaining critical requests — 68 chains found 
-  Keep request counts low and transfer sizes small — 212 requests • 15,555 KiB 
-  Largest Contentful Paint element — 1 element found 
-  Avoid large layout shifts — 2 elements found 
-  Avoid long main-thread tasks — 20 long tasks found 
-  Avoid non-composited animations — 1 animated element found
